

NISHAN ROSARY S

Bangalore, India

+91-97399-02765 nishanrosary908@gmail.com linkedin.com/in/nishan-rosary github.com/NishanRosary

Professional Summary

AI-driven Software Developer with hands-on experience in building predictive systems and data-driven applications. Proficient in Python-based machine learning, with foundational knowledge of NLP, LLMs, and RAG concepts. Familiar with data analysis concepts including data cleaning and visualization using Power BI and DAX through academic learning. Strong foundation in backend development and problem solving, with a keen interest in applying AI and data analytics to real-world solutions.

Education

St Joseph's University

Bachelor of Computer Applications (BCA)

Jul. 2023 – Apr. 2026

Bangalore, India

St Joseph's Pre University College

CEBA (Computer Science, Economics, Business Studies, Accountancy)

Mar. 2021 – Apr. 2023

Bangalore, India

Technical Skills

Frontend: HTML, CSS, JavaScript, React, Figma

Backend: Python, Node.js, Express.js, JWT Authentication, SMTP Automation, Rest API

Databases: MySQL, MongoDB Atlas, AWS

AI and Machine Learning: NLP, LLM, NumPy, Pandas, Scikit-learn, Flask, Random Forest Algorithm

Generative AI: Claude, Antigravity, Cursor, Codex, Sarvam, PowerBI Copilot

Other: Git, Github, VS Code, PowerBI, Excel, Spreadsheet, Postman, Vercel,

Professional Skills

Team Collaboration — Problem Solving — Communication — Design Understanding — Attention to Detail —
Adaptability — Time Management — Continuous Learning — Testing and Debugging — Prompt Writing

Projects

Smart'Q Management System | *React, Machine Learning, SMTP, AI-Driven IDE*

- Built a smart digital queue system to reduce physical waiting time using real-time tracking and crowd prediction.
- Built the complete frontend using React.js with a scalable and modular component architecture.
- Integrated ML models to predict waiting time, queue length, and peak hours..
- Planning to integrate n8n automation for sending booking confirmations and reminders via WhatsApp, Gmail.

BudgetFlow | *Antigravity, Claude, HTML, CSS, JavaScript*

- Built a family income and expense tracking system to manage complete household financial activities efficiently.
- Designed structured budgeting modules allowing multi-member tracking within a single family account.
- Implemented a private budget section secured with password authentication for confidential financial entries.
- Focused on clean UI, usability, and real-world financial organization to enhance practical user adoption.

Experience

Beegle Technology

Jul. 2024 – Mar. 2026

Operations Executive

Bangalore, India

- Awarded Best Performer of the Month for delivering strong results and improving operational efficiency.
- Improved operational efficiency by analyzing workflows and resolving customer issues effectively.
- Coordinated between teams and clients, strengthening cross-functional collaboration.
- Managed escalations using structured problem-solving approaches.
